

Known Issues

| Team | ADO # | Feature Type | Title | Issue / Change | State |
|------------------|-------|----------------|---|--|---|
| Assignments | 27908 | ECR-Low | USAR Soldier stationed OCONUS has DEROS error | To adjust how we are managing DEROS for USAR. We currently have no logic by Service Component. Within that code change we would run a data fix. | Working 2Q25, release pending completion and competing priorities |
| | 28172 | ECR-Low | AOS: Update NGDGB logic to include all ARNG Title 10 positions | The current AOS logic overrides the BU for USAR AGR (92) and USAR IMA (87, DM, MD, MQ) personnel based upon the remark codes for the position. The ARNG is requesting similar logic using the remark code 89 for all ARNG Title 10 positions. | Working 2Q25, release pending completion and competing priorities |
| | 46155 | ECR-Low | Change TRADOC Reception BNs to Bucket Positions | Excessive Templates in UICs creates performance issues during App Engine Load process as well as individual positions selection. | Working 2Q25, release pending completion and competing priorities |
| | 46451 | ECR-Low | Remove the Attachment functionality within the Assignment pages | Attachments stored on assignments that do not transmit to iPERMS and become only storage problems for IPPS-A. | Working 2Q25, release pending completion and competing priorities |
| | 48615 | ECR-Low | TDY Admin/PERSTEMPO | HR Pros are unable to capture and track PERSTEMPO Events for the different exercises their members go on. | Working 2Q25, release pending completion and competing priorities |
| Benefits and Pay | 12959 | ECR | DMDC 1148/1336 - Loss Transactions Missed for MPC Changes | Since go-live, over 7K loss transactions for MPC changes have been missed due to compounding of transactions executed on the same day in assignments; Gain transactions are also being missed for the same reason. | Working 2Q25, release pending completion and competing priorities |
| BI Reporting | 12939 | Research Spike | COA to manage impacts of BI loads to reporting results | When counting whole-Army strength count(s) simultaneously from both canned BI reports and an Ad Hoc Query at the same time, and BI Loads are occurring at that exact same time, a user may observe a slight difference of less than half a percent while one report briefly catches up with the other. | Pending work based on priorities |
| Foundations | 13023 | ECR-Low | NON DEPLOYABLE MRC / MRRC Codes incorrect on profile | Inability for the Army to accurately report medical readiness and non deployable reports. (File received) (Due back from MODs on 12/16; file date incorrect on the file) | Working 2Q25, release pending completion and competing priorities |
| | 13078 | ECR-Low | Obtain Deployment Limiting Condition Codes from MODS and map to HCM | Three primary impacts: 1) Inability for the Army to accurately report medical readiness in DRRS-A; 2) Inaccurate restrictions caused by improperly considering temporary profiles < 30 days; and 3) BI resources spent managing this logic (updates, fixes) (File received) (Due back from MODs on 12/16; file date incorrect on the file) | Pending trading partner work |
| | 33787 | External Issue | External Issue/ ATRRS/ Historic Course Duration provided in mixture of HRS/WKS and sometimes null | This ticket supports efforts to work with ATRRS to standardize how they send us course information (hours vs. weeks). | Pending trading partner work |
| Hire - Rehire | 13145 | ECR | New SFTP Request: Interactive Personnel Electronic Records Management System (iPERMS) | Type of interface for the new RRT Redesign effort is TBD based on collaboration between the two systems. Based on previous discussions, iPERMS is prepared to receive the new data via Topics and/or flat file via SFTP (for Pay entitlements). | Working 2Q25, release pending completion and competing priorities |
| | 17025 | SPR (SEV 3) | SPR 16561 BD_ELIG failing on PMOS and SMOS | When a new PMOS is added by a user, the current PMOS is pushed to SMOS. However, the current SMOS is not pushed to Additional MOS. Hence, there are two active SMOS with the same effdt. (Dependency with Foundations work) | Pending additional analysis |

*All IPPS-A Release Notes are posted under IPPS-A Resources on [S1Net](#)
