IPPS-A Mobile App Capabilities

- The IPPS-A app is the first in the Army to allow mobile access to an Army human resources system, with comparable commercial technology.
- Soldiers have the flexibility to operate on the move, accessing their personnel records on a smartphone or tablet using their DS Logon.
- Soldiers can submit help inquiries, request updates to their record, and monitor the status of their personnel actions through the app without an in-person trip to a G1/S1 shop.
- Commanders and HR Professionals can access their elevated roles on a DoD smartphone or using a CAC reader on a personal device, allowing them to review and approve transactions without being at their desk or work station.
- Transactions are automated, paper-free and trackable from initiation to approval — providing a level of transparency like never before.
- Data is secured over a commercial network with the same level of sophistication that secure banking and personal service apps have today.
- IPPS-A is part of the Army's efforts to improve its data posture, informing the Army Data Plan to enable data-driven decisions.
