

# UPDATE PERSONNEL RECORDS JOB AID

This Job Aid assists Members in executing updates to their records.

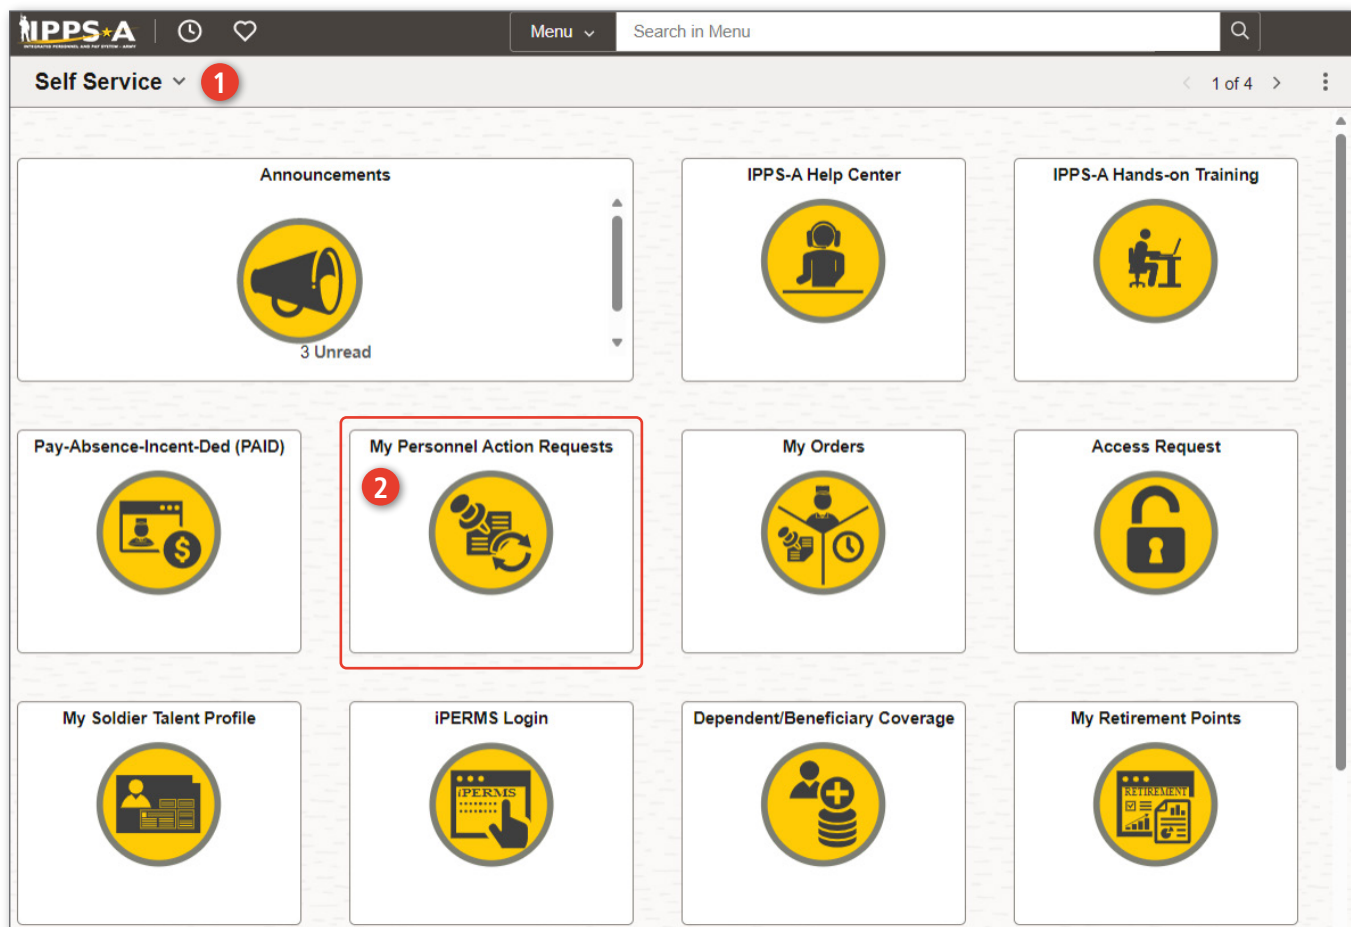

## SECTION 1: Admin Record Corrections PAR

The first section assists Members in executing an Admin Record Corrections Personnel Action Request (PAR) via the My Personnel Action Requests tile. This process creates a PAR to add, update, or correct a Member's administrative record. Upon submission of the Admin Record Corrections PAR, the request routes to the Member's S1 pool for review, approval or disapproval.

## SECTION 2: Self-Professed KSBs and Preferences

The second section assists Members in adding Self-Professed desired attribute(s) via the Talent Management (TAM) Soldier Workcenter tile. TAM enables Members to manage their self-professed Knowledge, Skills, and Behaviors (KSBs) and Preferences. Members can add, maintain, and edit self-professed KSBs to represent the Member's total talent management profile accurately.

**TALENT MANAGEMENT**

The Army is undertaking the most comprehensive reform of its three officer personnel systems (Active, Guard, and Reserve) across the Total Force since the Officer Personnel Act of 1947. The 2019 National Defense Authorization Act granted several new authorities that provide the Army flexibility to determine the characteristics of a future talent-based system. The Army has determined how it will implement the new authorities and is on the verge of releasing several new policies and initiatives that set Army Talent Management in motion.

The Army is moving from the industrial age to the information age through modernization changing:

- How we fight: Multi-Domain Operations
- How we equip: Army Futures Command
- How we manage our People: 21st Century Talent Management

Guiding Principle: Right Officer, Right Assignment, Right Time, Over Time

- Requires a granular knowledge of all officers; better information leads to better decisions
- Manages all officers - greatest impacts to 6-60%
- Make a new & better system, not make the system better
- Move from data-poor to data-rich systems powered by 21st Century IT
