

Temporary Visual Change to Search Boxes

BLUF

Starting Jan. 10, a temporary visual adjustment will display on certain pages. This is a look and feel adjustment to the search boxes only; the core functionality of the system is not affected. All processes, including the DD Form 214 and Personnel Action Request (PAR) functions, will continue to operate as normal.

CURRENTLY

1   

1A      

2 

Personnel Action Requests
 There are no personnel actions. Click the button to create a new one.

NOTE: During testing of the mandatory PeopleTools upgrade, it was discovered when a side page has a Group Box Type of Accordion Vertical any button or prompt click on the side or main page would cause issues to the system.

TEMPORARY FIX BEING IMPLEMENTED JAN. 10

2

Personnel Action Requests
 > My Personnel Actions
 > Search for All Members
 > Search for All PARs

Personnel Action Requests
 There are no personnel actions. Click the button to create a new one.

NOTE: The temporary fix will remain in effect until Oracle provides a permanent fix.

Oracle PeopleTools: Group Box Type

- 1) Currently, search options appear in an accordion layout.
 - 1A) The system only allows one grouping to be open at a time and will auto-collapse if another search group box is opened.
 - 1B) Arrows are placed on the top right of the search box group.
- 2) With the temporary fix, search options will appear in a collapsed layout. However, now when a Member opens one box the other boxes remain open. Sections will no longer close automatically.
 - 2A) Arrows are now placed on the top left of the search box screen.

Audience: All Stakeholders

As of 5 Jan 2026
